and support

Smart New Generation
E-for-Easy.
E-for-Electric.

We are mad keen on this next Generation of SAM Feed Wagon! You will love it. It's foolproof AND future proof.

- This SAM is simple for everyone on the farm to use, very accurate and incorporates smart and intuitive Kiwi tech.
- The main floor speed is controlled from a screen on your wagon. The screen is reliable, hardy and waterproof.
- This set up also includes wifi to mirror to any device e.g. your mobile, tablet or in-cab screen.

- Load cells give an accurate measure of the weight of feed in the bin and can be zeroed at any time.
 - There is also a handy diagnostics function for each individual load cell.
 - No complicated navigation - your ten year old could operate it!
- 10, 12 & 15 cube models make up the range. Choose either a low maintenance stainless chain side-feed or a simple centre-feed delivery.

Reliability plus.

SAM Feed Wagons are built tough for lasting performance. Complexity is engineered out to ensure they are strong, reliable and easy to use and maintain.

There are two tiers: Simple / Smart (e-Wagon with wifi & load cells)

SIMPLE RANGE

SMART RANGE

Stainless chain side-feed

A stainless chain side-feed conveyor comes standard. They are built to last. The 25mm conveyor bars provide a positive directional flow for a range of feeds. Heavy roller chains eliminate tracking issues with less maintenance requirements. Built to clear troughs. Belt side-feeds are also available.

Industry leading coating protection

All SAM Feed Wagons have seen a new evolution of painting procedure. This is for extra corrosion protection. Firstly a blast then a thermal-arc spray, followed by the SAM coating difference. It is mega tough stuff!

Trans-Tex deck flooring

Standard on all SAM Feed Wagons, Trans-Tex 21mm is a high-strength ply timber. Recognised for its high bending stiffness and high-impact resistance in the trucking industry. These decks are constructed for longevity.

Control from your pocket!

Upgrade to an e-Wagon

A reliable waterproof screen is supplied with SAM e-Wagons. This set up includes load cells and wifi to mirror to your device e.g. your mobile tablet or incab screen. There is also a handy diagnostics function for each load cell.

Stainless sides

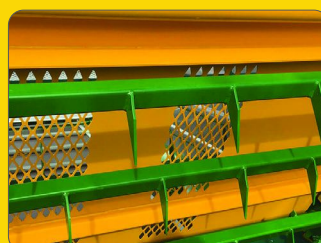

Stainless fronts and sides also cut out rusting giving you peace of mind.

The chassis has been designed with ample clearance from the ground, to save bellying out in varied terrain.

Remote greasing

Remote axle-greasing saves time and effort giving you access to all axle greasing points in an easy to reach location. An effective way to improve machine maintenance.

SAM Service

Our SAM range is backed by a quick and efficient support service from central Hamilton. The team are also available for technical help.

All SAM's go through rigorous quality testing. They also have a comprehensive warranty. We deliver quality products and stand by them.

OPTIONAL EXTRAS

400 x 15.5 (14 Ply) tyres
Upgrade on 10 cube & included on 12 cube
Hydraulic side-shift kit
All side-feed delivery models 250mm
LED lights & hazard panels
Brakes
Safety chains (10 or 13mm)
Skid (for use with quick hitch)
e-Wagon (with screen & wifi to connect to your mobile)
Dedicated rugged touch screen tablet
